

New StoreX Liconel

Maximum Protection for your Samples

- Proven De-Contaminating Properties of Copper Ions
- Very Small Aging Effects due to Oxidation
- Long-Term Stability for True and Accurate Results
- Stable at 4...50° C
- Microbicide to Bacteria, Fungi etc.

The new Liconel based StoreX Series is the market leading contamination prevention incubator family. Liconel technology combines the de-contaminating properties of copper ions with the advantage of extremely low aging effects as with stainless steel. This ensures long-term stability and will help your discoveries to be true and accurate.
